

Maple Tree IDS System

IDS Server

Specifications

● Chipset	Intel 945GV+ICH7R
● Processor	Intel E4500 or up
● Ram	2G
● Networking	1000/100M(Intel Series)
● HD	SATA 250G(16M) or up
● Power	100VAC-220VAC 50/60HZ 300W
● Other	PS2; 4×USB; 3×PCI; DVD-ROM
● Relative Humidity	5%-95%; Non-condensing
● Environment Temperature	0°C-55°C
● Dimension	2U; 89.2H×473D×482W(mm)
● Net Weight	15Kg

IDS Software

A complete software suite is designed specifically for our managing information display networks. There are several components which including data management, content Management, device Management etc. The software is built on Microsoft® Windows® technology. Content delivery is done using standard TCP/IP protocols.

- **Content Management:**
Assemble, schedule, deliver and playback content across your network using standard file formats and protocols.
- **Device Management:**
Manage remote devices across your network with scheduled functions and real time status monitoring.
- **Data Management:**
Acquire and distribute real-time data from multiple sources including subscription-based news, weather, financial data and instant messages.
